SHUBHAM GROVER

QA Tester & AI Automation Specialist | Data & Software Solutions

Delhi NCR, India • +91 8287161682 • **shubhamgrover001@gmail.com** • **linkedin.com/in/shubham-grover** • **github.com/Shubhamgrover001**

PROFESSIONAL SUMMARY

Results-driven QA Tester & AI Automation Specialist currently pursuing an MCA, with hands-on expertise across software testing life cycles, generative AI integration, and full-stack environments. Proven experience at LogicLoom delivering functional, regression, and API endpoint verification across enterprise ERP and SaaS systems. Proficient in prompt engineering with Large Language Models (LLMs) to automate edge-case test suites, synthesize datasets, and accelerate defect triaging by 45%. Combines core analytical competencies in Python, SQL, and Power BI with rigorous QA standards to drive reliable, zero-defect software deployments.

TECHNICAL SKILLS & CORE COMPETENCIES

Testing & QA:	Functional, Regression, Smoke/Sanity, API Testing, UI/UX Validation, Test Plan & Case Design, STLC/SDLC, Defect Lifecycle, RCA
AI & Automation:	Generative AI, Large Language Models (LLMs), Prompt Engineering, LLM-Assisted Development, Synthetic Test Data Generation, Automated Bug Triaging, Agentic AI Workflows
Data & Analytics:	Microsoft Power BI (DAX, Star Schema, Power Query), Exploratory Data Analysis (EDA), Predictive Delinquency Modeling, Advanced Excel
Languages & DB:	Python (Flask, Pandas, NumPy), SQL (PostgreSQL, MySQL, SQLite), HTML5, CSS3, JavaScript, SQLAlchemy
Tools & Platforms:	Postman, Git & GitHub, JIRA, WordPress, Duda 2.0, Razorpay API, pytest

PROFESSIONAL EXPERIENCE

LogicLoom LLP – QA Tester & AI Automation Specialist 08/2026 – Present | Gurugram, India

- Execute end-to-end quality assurance across enterprise ERP products, SaaS platforms, and client web solutions, identifying critical functional bottlenecks and UI regressions prior to deployment.
- Leverage enterprise Generative AI and Large Language Models (LLMs) with structured prompt templates to generate edge-case test suites and synthetic datasets, cutting manual test preparation time by **45%**.
- Conduct API endpoint testing and backend validation using Postman and SQL, verifying relational schema integrity and transaction security across microservices.
- Perform server/browser log root cause analysis (RCA) to accelerate defect reproduction and shorten turnaround times.

Adaan Digital Solutions – Web Builder Intern 08/2025 – 10/2025 | Delhi, India

- Built and deployed responsive web interfaces for **80+ client projects** utilizing Duda 2.0 and WordPress ecosystems.
- Conducted cross-browser and cross-device UI audits to eliminate layout regressions, achieving a **98%+** client satisfaction rating.

KEY PROJECTS & PRACTICAL SIMULATIONS

Trippy Trail – Python, Flask, SQLite, Razorpay, pytest Full-Stack & LLM-Assisted

- Built a full-stack travel booking app for curated trips (Shangarh, Jibhi & Shoja, Kashmir) with a Flask + SQLite backend: server-side pricing, idempotent bookings, Razorpay payments (mock mode, live-ready) with HMAC-verified webhooks, and a token-protected admin API with CSV export and rate limiting.
- Developed using LLM-assisted workflows (prompt-driven design and iterative code generation) and verified with a pytest suite; front end includes light/dark/system themes, a price estimator, and PDF estimates.

Library Management System (LMS Portal) – HTML, CSS, JavaScript Full-Stack & Role-Based Access

- Built a single-file web app for running a library with three user roles (admin, librarian and reader), published on GitHub.

Tata Group (Forage) – GenAI Powered Data Analytics Simulation 10/2026

- Conducted exploratory data analysis (EDA) and credit risk profiling on financial datasets using GenAI tools for structured insight extraction.
- Formulated a predictive delinquency framework and architected an AI-driven collections strategy incorporating agentic AI automation and regulatory compliance.

Smart Inventory & Supply Chain Engine – Flask, PostgreSQL, SQLAlchemy, Chart.js Full-Stack & QA

- Architected a full-stack inventory portal featuring real-time stock-level analytics, automated reorder triggers, and visual data dashboards.
- Implemented strict backend constraints via SQLAlchemy to eliminate race conditions, designing test cases for edge-case stock depletion and concurrent transactions.

Global Airbnb Analytics & Enterprise SQL BI Engine – Power BI, DAX, PostgreSQL Data Modeling

- Built an analytical Star Schema across **2.8M+ rows** with 25+ DAX measures, uncovering that top 3 cities drove 48% of total revenue; wrote complex CTEs and window functions (DENSE_RANK, LAG) for MoM customer retention trends.

EDUCATION

Master of Computer Applications (MCA)
IGNOU, New Delhi | 3rd Sem (Expected 2027)

Bachelor of Computer Applications (BCA)
PDM University, Bahadurgarh | Graduated: 05/2023 (CGPA: 7.48)

CERTIFICATIONS

GenAI Powered Data Analytics Tata / Forage
Credential Code: Dtjd6CEboQ3IBDg3 | Oct 2026

SkillQuest: Generative AI Literacy Simplilearn
Certificate ID: 69550497 | Verified Oct 2026
